

I want to voice my desire not to weaken the no call list by allowing companys that I do business with to call for any reason. It is not the same as receiving letters in that you have to drop everything you are doing to listen to long speals about things you are not interested in. I have ceased doing business with several companys prior to the no call list because of the constant calls. I will never do business with them again. This law was created by the people and for the people. Please do not destroy it.
